

Framed Prints – (example to the right) Traditionally framed prints, for example a 12" x 8" print, mounted with card overlay and framed behind Perspex with brown wood/gold inset frame - £75 including delivery. Other sizes, both smaller and larger, or with a different frame type are available

Framed Canvass – traditionally framed canvass prints. For example 16"x12" with brown wood frame with gold inlay at £100, a 14"x11" would cost £90. Other frames and sizes are available.

See frame choices on following page

Canvass Mounted Prints and Inkjet prints mounted – a Canvass print, wrapped around an MDF board (example left). In any size - as a guide, up to 20" on the longest dimension (e.g. a portrait picture 20" x 16"), ready to hang on your wall - £95. Smaller and larger sizes are available

An alternative, for a Black and White image, is an inkjet photo print, mounted on MDF, with the edging painted in black – available at the same price.

Composite Prints – a collage print using several of your favourite images, printed and framed. Choose two or three (or more) images you like and I can prepare a sample collage for you.

Stunning Acrylics – (example left)

A modern finish to a special image.

The contemporary way of printing and displaying photography and artwork. Acrylic Prints are produced by printing high resolution images directly to the reverse of crystal clear high grade acrylic. For that final touch, the edges of the 8mm (~3/8") acrylic are diamond polished.

Prices start from £120

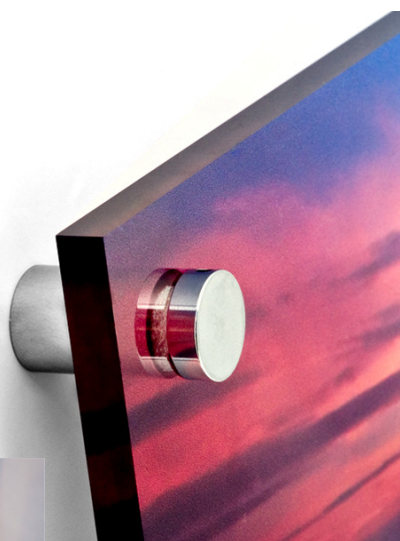

Choose from two finishes shown below – opaque or transparent

Finish Opaque

The Opaque acrylic print is backed in white ink making it opaque. The print displays an image just as a standard photograph does. The opaque finish is not transparent and therefore prints can be hung on any wall colour.

Opaque styles are 100% fade resistant, weather proof and can be hung anywhere, including outdoors.

Create a strong impact!
Images/photos made up of large areas of white or light colours look fantastic when combined with the opaque finish.

Finish Transparent

The transparent acrylic print is surprisingly enough, slightly transparent. Any area of an image which are white will be transparent. The print relies on a white/near white wall (in which it should be hung) to act as a white background, allowing any print detail to stand out.

Transparent styles are 100% fade resistant, weather proof and can be hung anywhere, including outdoors.

Fantastic light effect!
Transparent acrylic prints produce a fantastic effect, allowing light to interact with the image.
